Umar Khan

IT Systems Manager | Checker Cabs - The Checker Group

Calgary, Alberta | muhammedumark.96@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL PROFILE

IT Systems Manager at Checker and University of Calgary software engineering graduate with experience in product design, software development, cybersecurity analysis, DevOps and project management. Brings software architecture, stakeholder coordination, secure application design, testing and reporting skills to operational technology delivery.

PROFESSIONAL EXPERIENCE

Checker Cabs / The Checker Group

2026 - Present

IT Systems Manager

Calgary, AB

- Technical coordination across dispatch systems, managed driver devices, reporting requirements and IT/vendor support.
- Over 30 hours of weekly workload saved through software automation and scripting.
- Develops internal applications and integrations between software providers. Creator of e-vouchers for Checker Cabs.

Tartigrade Inc.

2025 - 2026

Project Manager | Software Architect

Calgary, AB

- Designed and developed an AI document standardization platform to transform third-party documents using approved templates and values.
- Architected a scalable backend and automated machine learning pipeline to reduce manual editing and support large document volumes.
- Worked with stakeholders on requirements, validation and document-system integration; delivered prototypes and architecture proposals throughout the project.

MBC Shahid

2025

Product Engineer

Remote

- Designed navigation and subscription pathways and product features, including transactional video on demand and a la carte offerings.
- Conducted competitor research and worked with product managers, designers and engineers to refine requirements, priorities and customer journeys.

Al Arabiya News Channel

2024

Full Stack Developer

Remote

- Contributed to an internal application handling confidential story data; developed backend services with Prisma and MongoDB and supported authenticated access.
- Participated in Agile standups and sprint planning with project managers and product owners to deliver production-ready features.
- Upgraded a legacy component library from Storybook 5 to Storybook 6 to improve maintainability and the development workflow.

PROJECTS AND TECHNICAL LEADERSHIP

MCC Downtown Centre

2025 - Present

Software Team Lead

Calgary, AB

- Leading UI/UX designers and developers in delivering a web application for a donation centre, coordinating development tasks and reviewing code.
- Architected backend systems and oversaw React-based frontend development and public API integration, with attention to scalability and resilience.
- Used Agile workflows and team coordination to support delivery quality; prioritized usability, accessibility and community needs.

Employee Management Dashboard

2025

Personal Project

Calgary, AB

- Built a centralized employee management platform using Next.js and React Native for web and mobile access.
- Designed secure authentication and role-based access control to protect employee data and enforce permissions, with scalability and maintainability in mind.

EDUCATION

University of Calgary - Schulich School of Engineering

B.S. in Software Engineering | 2026 | Calgary, AB

Specialization in AI and Machine Learning

RELEVANT SKILLS

Project delivery

Requirements review, stakeholder coordination, Agile planning, technical documentation, Jira

Reporting & data governance

SQL, Python, Pandas, Power BI, Excel, MySQL, MongoDB

Software development

Java, JavaScript, TypeScript, React, Node.js, Next.js, Prisma, API integration

DevOps

AWS, Azure, Git/GitHub, Docker, Kubernetes, CI/CD practices, Bash/Python scripting

Security & quality

Cybersecurity analysis, authentication, role-based access control, confidential data handling, unit testing, performance testing, reliability testing
